EXPERIENCE

Full-stack developer at MAEVENTS { React, Meteor }
October 2017 - Present | Paris
Collaborating with a tour operator as the only developer to transform its process into a web application
Programming a single and trustworthy client base, a contract generator and a trip participants management tool

Back-end developer intern at Hub-Grade { Symfony3 }
March 2016 - August 2016 | Lyon
Partnered with two front-end developers as the lead back-end developer
Implemented an API respecting the REST architecture
Developed the version 1 of the website which allowed the startup to grow, raise found and expand to Paris

Full-stack developer intern at SNCF French railway company { Symfony2, Bootstrap }
April 2014 - July 2014 | Dijon
Worked in close collaboration with on-site technicians to provide them the means to track breakdowns
Built a tool which allows technicians to add and rate the best solutions for each failure thus improving the reparation speed
